#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/6/2006 has been entered.

***Rejections Withdrawn***

2. Claims 21 and newly submitted claims 27-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, made in the last Office Action of 4/18/2006 has been withdrawn in view of the amendment filed on 10/6/2006.

***Response to Arguments***

3. Applicant's arguments with respect to claims 27-29, 31-32 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1772

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 27-29, 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Pedginski (WO 95/33013).

Pedginski relates to a process of making six layer composite material (page-17, lines 16-18, wherein when in a roll form, the composite will have at least six layers) with a plastic layer that has release properties (page-9, lines 20-25). The process comprises locating materials producing the release properties within the plastic layer (10), wherein a first web (20) is provided in production of the composite material on one side of which a layer of adhesive (30) is located, said adhesive is always co-extruded with the plastic layer with the release properties and which in-turn, is bonded to a second web (when the web is in a roll form), wherein the first web and the second web is selected from the group consisting of paper, metal foil, and non-woven fabric (page-9, lines 5-7). The process includes providing the webs in a spaced apart position and extruding the adhesive and the release layer between the webs and forming the bond between the twb webs (when in a roll form, the composite would lap over the previous layer and hence, form a composite wherein the adhesive and the release layer would be located between the substrate and the substrate of the previous layer).

The composite will include further layers located on and bonded to both sides of the web when the composite is in a roll form because the further layers would include the layers that are located above and below the composite layer.

For claims 27-29, the roll form of the composite of Pedginski would provide for the first and second web to be of paper, metal foil or non-woven fabric.
